

General Overview: Automotive

The Automotive Industry has remained a key sector for Regina Industries despite changes in technology and manufacturing processes.

Working with leading automotive component manufacturers, we have delivered solutions to help clients with cost effective components predominantly in the after sales market.

Many clients specify parts from Lucas, Sumitomo, Leoni, Rists and other OEMs which we have tooling to mould in house.

Some of the parts we have manufactured include but not limited to:

- Lucas wiring harness connectors
- Terminal covers
- Battery Lug Covers
- Grommets
- "Boots"
- Cable Management systems

Capabilities

We have the capabilities to **injection mould up to 500g in weight** and can offer guidance bespoke to the clients specification.
